

What did I get out of this course?

Unidentaldirect wants to thank you for your presence at the July 23-28 2012 Dental Implants Intensive Course. Our goal is to serve the dental doctors who want to learn and start placing implants with confidence, having the best and closest experience to the practice. In order to accomplish our goal we need your feedback. Please write a few lines to express the whole experience. Use the following as a guidance to cover the topics.

Reception, Accommodations, Transportation, etc.

Lectures, topics covered, content, presentation, teachers, environment, etc.

Practice, organization, rotation of roles in the surgical room, professors assistance during procedures, etc.

Implants, packaging, manipulation, placement, primary stability, etc.

Surgical tools, etc.

Personal experience with the group, staff, etc.

The professors who teach are quite academic in their outlook, which is what I found most interesting. There was excellent surgical training in the OT. I learnt a cool way to suture and lots of Spanish. Of course, the language was a bit of a problem but the main concepts were well reinforced during practical training. They are a really good team to learn from, not just surgery but all the preparation that goes into it.

How did your self confidence change about your ability to sell, evaluate a patient, plan the procedure and execute the treatment.

Definitely more confident in placing implants.

Overall experience:

() under expectations, (/) as expected, (/) over the expected, () well over I expected
